Below are the equipment components for Lottery Product. Equipment installed in your location will vary with the type of business you have.

## Component Definitions:

Retailer Compact: Clerk operated terminal
Window Jackpot Sign: Displays Powerball, Mega Millions, Oregon's Game Megabucks, draw times and jackpot amounts.
Game Touch 28 \& 20: Player operated terminals
WinCheck: Device used by customer to see if ticket is a winner
Printer: Thermal printer for clerk operated terminal
Monitor: 32" or 43"
Installation and service of the above devices provided by IGT.
Router: A network device used to direct electronic communication from one device on a network to another device on a network.

| Terminal Type | Height (in <br> inches) | Width <br> (in inches) | Depth <br> (in inches) | Weight <br> (in lbs) | VAC <br> Start Up <br> Amps |  |
| ---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Retailer Compact | 14.6 | 9.8 | 11.3 | 9.8 | 120 | 3.0 |
| Printer | 5.81 | 5.75 | 7.75 | 4 | 120 | 1.5 |
| Game Touch 28(GT28) | 74.0 | 35.3 | 27.2 | 812 | 120 | 3.0 |
| Game Touch 20(GT20) | 54.0 | 38.3 | 28.8 | 700 | 120 | 3.0 |
| WinCheck | 12.03 | 6.73 | 3.58 | 3.1 | 120 | 0.5 |
| with Base | 12.47 | 7.45 | 4.85 | 3.6 |  |  |
| Retailer Pro | 16.0 | 14.2 | 15.9 | 37 | 120 | 1.5 |
| HP Router 1841 | 1.75 | 13.5 | 10.5 | 6.41 | 120 | 1.0 |
| Play Center | 54 | 20 | 20 | 62 | NA | NA |
| Window Jackpot Sign | 19 | 14 | 4 | 3.6 | 120 | 2.0 |
| ShowController |  |  |  |  | 120 | 0.5 |

Note: Win Check should be 36 inches from the ground for ADA

## System Wiring Requirements -

IGT is the Lottery Product Portfolio vendor who provides the communication wiring between equipment components. Use of a licensed electrical contractor to obtain all permits and install all electrical service wiring is strongly recommended. Unauthorized alteration, repairs, or tampering with telephone communication or electrical service wiring may result in interrupted service and a charge for repairs.

## Input power and outlet -

Lottery Product equipment components require one dedicated $20-\mathrm{amp}$ circuit with three wire grounded standard wall outlets. The number and location of the Draw Game System components determine the number of outlets.

The Lottery Area Logistics Specialist will contact new retailers to schedule a planning meeting with the retailer, the licensed electrical contractor and Lottery Field Sales and IGT Customer Service Representatives to plan the installation of the Lottery Product Equipment. If you have questions, or you need to relocate equipment, contact the Lottery Area Logistics Specialist two weeks prior to the move. For additional assistance, please call 1-800-766-6789.
